Gabriel Solomon

Product Engineer

gasolomonc@gmail.com s-o-l-o.xyz github.com/0xgasc New York / Guatemala City

I design, build and run software products end to end. I spent ten years at Colgate-Palmolive leading digital transformation and compliance programs, and since 2025 I have run my own product studio.

Experience

Offset Works

Founder and product engineer — 2025 – Present

- Build and run live products for clients in the US, Europe and Latin America: ticketing, payments, tour booking and ERP tools.
- Use AI in production for document parsing, procurement research and assistants over business data.
- Sold 250 tickets for a live fundraiser on my ticketing platform, and every ticket scanned at the door without a failure.
- Built FlyIn Guatemala (flyinguate.com), a helicopter-tour booking platform with Apple Wallet passes that took nearly $10,000 in bookings in one month.
- Built UMO Live, a fan archive for Unknown Mortal Orchestra with 200+ users and 150+ clips from this year's tour, linked from the band's website since March 2026.
- Built payment infrastructure: a stablecoin checkout for international merchants and a bank-transfer verification service.

Colgate-Palmolive

Digital Systems & Compliance Global Program Manager — 2024 – 2026

- Led enterprise software rollouts and cross-border compliance, including KYB due diligence on manufacturers and warehouses.
- Owned quality-system documentation and its integrations with SAP.

Plant Strategy & Digitization Project Manager — 2023 – 2024

- Took a personal-care plant fully paperless in eight months.

Global Operations Excellence & Digital Transformation Project Manager — 2020 – 2023

- Ran a digital transformation program for 15,000+ users and 300+ use cases across the supply chain.
- Managed about $1M of investment in digitization and optimization that saved over $10M worldwide.
- Managed an AI connected-worker vendor from requirements to global scale, including an integration with SAP Plant Maintenance.

Continuous Improvement & Analytics Engineer — 2016 – 2019

- Managed factory performance and reliability using IoT and operational data, and ran improvement budgets with Six Sigma.

Education

MSc Blockchain and Decentralized Ledger Technology, University of Nicosia — 2023 – 2026 (expected)

MBA, Universidad Francisco Marroquín — 2018 – 2019

BSc Industrial Engineering, Universidad del Valle de Guatemala — 2013 – 2017

Skills

Engineering	TypeScript, React, Next.js, Node, NestJS, PostgreSQL, Supabase, Prisma, Python, SQL, Swift; Vercel, Railway, Cloudflare, Docker
AI tools	Claude Code, Codex, MCP, Hermes; Anthropic, OpenAI and Google models
Payments	Stablecoins, card processors, bank-transfer reconciliation
Operations	Program management, Lean Six Sigma, SAP, ETQ Reliance, internal audit, Tableau, Domo
Languages	English, Spanish (native)
